SUMMARY

Software engineer with professional web development experience since 2024. Build responsive websites and web applications, and work on production voice and SMS automation. Use React, Vue, TypeScript, Node.js and PostgreSQL across frontend and backend development.

SKILLS

Frontend: React, Vue.js, JavaScript, TypeScript, HTML, CSS, responsive design, Figma, WordPress

Backend: Node.js, Express, PostgreSQL, Prisma, Redis, BullMQ, REST APIs, webhooks

Tools and platforms: Git, Vitest, Docker, Kubernetes, DigitalOcean, Twilio, LiveKit

EXPERIENCE

Agentic AI Engineer | Orion AI Solutions

Jun 2026 to Present | Remote

- Build voice and SMS automation with TypeScript, Node.js, Twilio and LiveKit, including dialing sessions, appointment booking and reminders.
- Debug call session failures and implement session reconciliation and retry handling, with tests and instrumentation to check behavior.
- Improve billing reliability with database row locks, idempotent charge handling and audit records.
- Implement tenant access checks in API routes and verify changes with automated tests and reviewed pull requests.

Frontend Developer | Systemic Digital

May 2026 to Present | Remote

- Build responsive business and marketing websites for clients, from page layout and implementation through deployment.

Frontend Developer | Arcovia

Jan 2024 to Apr 2025 | Contract | Remote

- Built web applications in React and Vue, improving mobile layouts, navigation and page performance.
- Integrated analytics to track user journeys and applied technical SEO improvements.

Frontend Web Developer | PA Advisor Group

Aug 2024 to May 2025 | Contract | Remote

- Redesigned the corporate website and simplified CMS workflows so the team could update content more easily.
- Automated build and release workflows for website deployments.

Web Developer, then Social Media Manager | Tutify

Jul 2024 to Jun 2025 | Islamabad, Pakistan

- Rebuilt the website for a company rebrand, creating wireframes, responsive pages and interactive features.
- Created landing pages for lead generation and managed Meta Ads campaigns.

EDUCATION

Bachelor of Computer Science | University of Engineering and Technology, Taxila

2022 to 2026

Final year project: AI Based Personal Health Assistant, awarded 3rd place.
